Professional Summary

Results-driven AI & Full-Stack Software Developer with 8+ years of experience building scalable web applications, intelligent system, and automation solutions.

Core Skills

- Language: Python, JavaScript, TypeScipt, SQL, Dart
- Software Development: Flutter, Flet, FastAPI, Django, REST API, GIT, Docker, Tkinter, React, Streamlit
- AI & Generative AI: LLM Applications, Prompt Engineering, RAG, AI Automation, AI Agents, OpenAI API, Hugging Face
- Automation: n8n, Workflow Automation, API Integration, Webhooks
- Design & Collaboration: UI/UX Principles, Agile Development, Technical Documentation, Problem Solving, Team Collaboration

Selected Personal Projects

Portfolio & Developer Showcase Platform

- Designed and developed a professional portfolio platform featuring project showcases and dynamic content management.
- Implemented responsive layouts, contact functionality, and optimized navigation.
- Integrated development-ready architecture and modern UI practices

Intelligent Appointment Booking & Automation System

- Developed an appointment scheduling and workflow automation platform with automated notifications and calendar.
- Built API integrations and backend services to streamline booking operations.
- Improved process efficiency through intelligent automation and user-centered design.

Personal Experience

Adiel Heroes - IT Tutor | AI & Software Development Instructor 2022 – 2025

- Responsibilities & Achievements
- Delivered hands-on training in software development, data analysis, and modern web technologies.
- Designed structured learning programs covering Python, JavaScript, full-stack development, and AI fundamentals.
- Mentored students on real-world software engineering practices and project implementation.
- Built practical demonstration applications using frontend and backend technologies.
- Introduced learners to generative AI workflows, automation tools, and API integration.

- Improved student engagement through project-based learning and technical assessments.
- Guided students on deployment workflows, version control, and collaborative development practices.

Technologies: Python • JavaScript • HTML • CSS • Flet • FastAPI • Django • SQL • Git • REST APIs • Generative AI

Uc-WebTech - Full-Stack Software Developer 2020 – 2022

Responsibilities & Achievements

- Developed and maintained web applications across frontend and backend systems.
- Implemented RESTful APIs and integrated third-party services.
- Collaborated on database modeling and application optimization.
- Built responsive user interfaces and improved application performance.
- Participated in debugging, testing, and deployment activities.
- Automated repetitive processes to improve operational efficiency.
- Supported software maintenance and technical documentation.

Technologies: Python • JavaScript • HTML • CSS • Django • MySQL • REST APIs • Git

Monvic - Junior Software Developer / Technical Support 2016 – 2018

- Responsibilities & Achievements
- Assisted in developing and maintaining internal business applications.
- Supported application testing, bug fixes, and deployment activities.
- Built small-scale automation scripts to improve workflow efficiency.
- Participated in UI implementation and system enhancements.
- Provided technical troubleshooting and user support.
- Contributed to documentation and process improvement initiatives.

Technologies: Python • HTML • CSS • JavaScript • SQL • Git

EDUCATION

- PGD in Computer Science – University of Port Harcourt (2023)
- BSc in Industrial Physics – Imo State University (2015)

CERTIFICATIONS

- Google Data Analytics – Coursera
- IBM Introduction to Software Engineering - Coursera
- Python for Everybody – University of Michigan(Coursera)
- SQL for Data Science – UC California(Coursera)
- Data Analysis with Python – Coursera
- Introduction to Modern AI – Cisco Networking Academy Program
- Create Digital Content, Communication and Collaborate Online – Cisco Networking Academy Program
